+1. I get blinking on some of my LEDs when I turn the dimmer down too far. Basically, if the voltage is low the bulb becomes a relaxation oscillator -- it charges up to the point where it can light the LED, turns the light on, drains itself and repeats the process. Actually rather pretty since this is a 16-bulb chandelier...

The 3057 bulb is compatible with many car light types, where it is ideal as a backup light bulb, brake light bulb, parking light bulb, taillight, and turn signal lighting. While not that dim, it has a low intensity, which makes it great for the rear part of the vehicle, compared to the frontal area for headlights and fog lights. The bulb has a relatively long life of 1200 to 5000 hours, and ...
