Neuropsychology

Giuseppe Vallar, Nicoletta Caputi, in Reference Module in Neuroscience and Biobehavioral Psychology, 2020. A Definition. Neuropsychology as a scientific discipline is a young field, although the earliest attempts to relate mental functions to the brain may be traced back to classical Greece, and Roman Empire (Pagel, 1958; Finger, 1994). Neuropsychology became an independent discipline only in ...

Neuropsychology - an overview | ScienceDirect Topics

What is neuropsychology? Neuropsychology is a branch of clinical psychology that studies how the brain and nervous system affect how we function on a daily basis. Unlike the use of neuroimaging techniques such as MRI, CT scans and EEG where the focus is on nervous system structures, neuropsychology seeks to understand how the various components
