Bodyline, also known as fast leg theory bowling, was a cricketing tactic devised by the English cricket team for their 1932–33 Ashes tour of Australia. It was designed to combat the extraordinary batting skill of Australia's leading batsman, Don Bradman. A bodyline delivery was one in which the cricket ball was bowled, at pace, at the body of the batsman in the expectation that when he ...

The most common, severe congenital anomalies are heart defects, neural tube defects and Down syndrome. Although congenital anomalies may be the result of one or more genetic, infectious, nutritional or environmental factors, it is often difficult to identify the exact causes. Some congenital anomalies can be prevented.
