Geologically, the Florida Keys are made up of the main exposed parts of coral reefs. Some of the islands have been exposed for so long that sand has built up around them, creating barrier islands, while other smaller islands remain as coral atolls. Additionally, there is still a large coral reef offshore of the Florida Keys in the Florida Straits.

The United States took control of Florida from Spain as part of the Adams-Onis Treaty of 1819. In 1821, the Territory of Florida was established and Andrew Jackson became the first governor of Florida. Florida's population grew over the next several years and soon it was large enough to become a state.
