In my practice I spend time taking a detailed history of bowel habit (consistency, frequency, mucus, blood and bloating) and of potential bladder or ureteric symptoms. Where pain is non-menstrual and an ovarian cyst and infection have been ruled out with an ultrasound scan, further gynaecological review is usually fruitless.

Remote consultations for gynaecology - Pulse Today

Assessing the patient. In general, clinical localisation of disease by the site of the patient's symptoms is unreliable. However, there is reasonable correlation between epigastric pain and gastroduodenal disease, right upper quadrant pain and hepatobiliary disease, and suprapubic pain and gynaecological causes. 1 It is therefore useful to categorise patients by their predominant presenting ...

Diagnostic tests: Imaging for chronic abdominal pain in adults

A clinical or radiological suspicion of malignancy. Fibroids which are palpable abdominally, or intracavity fibroids and/or whose uterine length is measured at ultrasound, or hysteroscopy, greater than 12 cm.

Fibroids | Health topics A to Z | CKS | NICE

Paediatric abdominal pain is a common problem that often poses a diagnostic dilemma. The vast majority of episodes are benign and self-limiting, but persistent abdominal pain may signify an underlying pathology requiring urgent intervention. Acute abdominal pain can also be caused by a wide range...
