A common rumor related to Harley Davidsons and oil is that synthetic oil causes damage to the workings of a Harley-Davidson motorcycle. Apparently, many Harley-Davidson motorcycle technicians state that using synthetic oils in your Harley could result in flat spots on roller bearings because the synthetic oils are too slick.

Harley Davidson Motorcycle Oil: What's the Best Kind?

The Harley Davidson oil has a far higher viscosity or weight than an automobile because as oil gets hotter, it gets thinner. A common car oil is 5 W30. This allows the oil in hot temperatures to go no lower than five-weight and no thicker in cold temperatures to 30-weight.

Harley-Davidson Engine Oil | JPCycles.com

The small Evolution engine permanently replaced the Ironhead engine, and as of November 2010, is still being produced by the Harley-Davidson motorcycle company. It can be found in Harley-Davidson's 883, 1100 and 1200 XLH Sportster models. The larger Evolution engine, however, was replaced by the Twin Cam 88 engine in 1999.

Harley-Davidson Evolution Engine Specifications | It Still ...

The 1,450 cc Harley Davidson Engine, also known as the Twin Cam 88, was a breakthrough in motorcycle history when it came out. The engine was made and used on many different Harley Davidson bikes from 1999 to 2006. This engine has recently been retired and a new engine based on the 1,450 cc is being used in new Harley Models.

Harley Davidson 1450CC's Engine Specifications | It Still Runs

The Harley-Davidson Twin Cam are motorcycle engines made by Harley-Davidson from 1998 to 2016. Although these engines differed significantly from the Evolution engine, which in turn was derived from the series of single camshaft, overhead valve motors that were first released in 1936, they share a number of characteristics with nearly all previous Harley-Davidson engines.
