The multiagent systems field can be understood as consisting of two closely interwoven strands of work. The first is concerned with individual agents, while the second is concerned with collections of these agents. The structure of the book reflects this division. Roughly speaking, the book is in three parts.

Abstract The study of multi-agent systems (MAS) focuses on systems in which many intelligent agents interact with each other. These agents are considered to be autonomous entities such as software programs or robots. Their interactions can either be cooperative (for example as in an ant colony) or selfish (as in a free market
