Applied Linear Regression Models Solution Manual

Review If the plot of n pairs of data (x, y) for an experiment appear to indicate a "linear relationship" between y and x , then the method of least squares may be used to write a linear relationship between x and y . The least squares regression line is the line that minimizes the sum of the squares $(d_1 + d_2 + d_3 + d_4)$ of the vertical deviation from each data point to the line (see figure ...
