Online tutoring is the process of tutoring in an online, virtual, or networked, environment, in which teachers and learners participate from separate physical locations. Aside from space, literature also states that participants can be separated by time. Online tutoring is practiced using many different approaches for distinct sets of users.

Online tutoring - Wikipedia

Among the different types of ML tasks, a crucial distinction is drawn between supervised and unsupervised learning: Supervised machine learning: The program is "trained" on a pre-defined set of "training examples", which then facilitate its ability to reach an accurate conclusion when given new data. Unsupervised machine learning: The program is given a bunch of data and must find ...
