Diffusion Osmosis Lab Answer Key

The purpose of the lab was to test out osmosis. No, my results did not exactly support my hypothesis because the bag with 0.0 M of sucrose should have a change of mass of 0, but instead, there was still a change in mass (4.9%). What can be concluded from this lab though, is water does follow higher concentration of "salts" for balance purposes.

OSMOSIS Osmosis is a special type of diffusion. It is the diffusion of solvent or water across a semi-permeable membrane (a membrane that allows for the diffusion of certain solutes and water) from an area of higher concentration to one of low concentration. For example, if a 1 M aqueous starch solution is
