Note: Since the size of the set for which we are looking for the median is even ($2n$), we need to take the average of the middle two numbers and return the floor of the average. Method 1 (Simply count while Merging) Use the merge procedure of merge sort. Keep track of count while comparing elements of two arrays. If count becomes n (For $2n$ elements), we have reached the median.

Mechanical Engineering, as its name suggests, deals with the mechanics of operation of mechanical systems. This is the branch of engineering which includes design, analysis, testing, manufacturing and maintenance of mechanical systems. The mechanical engineer may design a component, a machine, a system or a process.
