Perimeter and area of triangles task - after the summative assessment, find five formative tasks that build the skill of "examining work to find mistakes" captured in the summative assessment; Circumference and area of a circle task

examples: authentic tasks: mathematics (Authentic ...

The first proof in Serra is to show that vertical angles are congruent using the conjecture that linear pairs of angles sum to 180 degrees. Students actually did pretty well with this, but most needed a little hint. And it helped to use algebraic expressions (which are absent in Euclid, of course).
