help others, KnowFree is the right platform to share and exchange the eBooks freely. While you can help each other with these eBooks for educational needs, it also helps for self-practice. Better known for free eBooks in the category of information technology research, case studies, eBooks, Magazines and white papers, there is a lot more that you can explore on this site.

Munkres Solution

Here you can find my written solutions to exercises of the book *Topology*, by James Munkres, 2nd edition. They contain all exercises from the following chapters: Chapter 2 - Topological Spaces and Continuous Functions, Chapter 3 - Connectedness and Compactness. Unfortunately, I do not plan to write down solutions to any other chapter in the future...

currently incomplete. I am working on getting the rest finished and uploaded. I frequently look back on my own solutions, realize they are wrong, and subsequently wonder how I could have ever thought they were correct; hence, if there are any confusing statements or incomplete solutions...

Solutions to Munkres' Topology - I did a math

The Hungarian method is a combinatorial optimization algorithm that solves the assignment problem in polynomial time and which anticipated later primal-dual methods. It was developed and published in 1955 by Harold Kuhn, who gave the name "Hungarian method" because the algorithm was largely based on the earlier works of two Hungarian mathematicians: Dénes König and Jenő Egerváry.

Hi, I found this problem in Munkres' topology book, and it seems to be contradictory: Let X be a metric space. (a) Suppose that for some $\epsilon > 0$, every ϵ -Ball in X has compact closure. Show that X is complete. (b) Suppose that for each $x \in X$ there is an $\epsilon > 0$ such as the ball $B(x, \epsilon)$ has...

Hi, I am not a mathematician, but I have noticed some recent papers on this seemingly new field, called Topological Data Analysis (see this relevant paper). I have had an overview of the applications and it seems that when you have data points that were sampled from some source (e.g. an image), you can use Persistent Homology to visualize what these data looks like in higher dimensions.
