The Double Helix A Personal

The Double Helix: A Personal Account of the Discovery of the Structure of DNA is an autobiographical account of the discovery of the double helix structure of DNA written by James D. Watson and published in 1968. It has earned both critical and public praise, along with continuing controversy about credit for the Nobel award and attitudes towards female scientists at the time of the discovery.

Gossip, backstabbing, petty squabbles, arrogance, snobbishness, and misogyny take a front row seat in this personal account of how the double helix structure of DNA was discovered. I expected more from Watson's book. And then there is the question about Rosalind Franklin's contribution to the discovery.
